## **DETAILED ACTION**

### ***Election/Restrictions***

1. Newly submitted claims 47-67 are directed to an invention that is independent or distinct from the invention originally claimed for the following reasons:

Regarding claims 47-67, the claims are drawn to the conversion of high-speed packetized information from a first optical format to a second optical format, while the original claims were drawn to a video distribution center. The newly filed claims recite an optical transmission system and method, which utilizes multiple optical protocol formats for communication to subscribers. The originally filed claims did not express an equivalent or similar invention.

Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, claims 47-67 are withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.

### ***Response to Arguments***

2. Applicant's arguments with respect to claims 47-67 have been considered but are moot in view of the new ground(s) of rejection. The applicant canceled all of the previous pending claims and filed new claims. The newly filed claims are directed to an invention that is independent or distinct from the invention originally claimed. Furthermore even if the new claims were directed to the same invention as originally claimed, the newly filed claims express limitations which are not adequately described in the specification. For example, regarding

claims 47, 58, and 62, the claims specify *converting from the first optical format to a second optical format* (For example, see claim 47, lines 14-15.) However, the specification does not describe a "second optical format," instead the specification merely mentions one optical format utilized when converting electrical signals to optical signals and vice versa (See specification page 23, lines 26-31). The applicant's specification does not describe any secondary "optical format," at best the specification describes one "optical format."

### ***Conclusion***

3. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
